Hamburg, 29.03.2016

Dear Sir or Madam,

attached, I am sending you the bid for the Project *“Deepening Economic Development for Peace and Stability in Plateau State”*.

We truly believe that each human being is born with all the ability to take care of himself/herself as well as of the welfare of the world and of every other individual.

Thus, with this edutainment movie, we would like to give voice to these gifts, but also to successfully provide them with technical and crucial knowledge. Particularly with regards to the value chain, and the establishment of businesses of any kind, the new debates concern the participation of developing countries in the different stages of production, their integration into global markets, the benefits and the challenges they may face, how they can participate and what determines their participation.

Thus, the crucial point is how to develop a pro-poor value chain, enacting a positive or desirable change to extend or improve productive operations and generate social benefits such as poverty reduction, income and employment generation, economic growth, environmental performance, gender equity and other development goals.

Thus, this is the main goal of our involvement in this project.

Please don't hesitate to contact us in case of any questions or inquiries.

Best regards, Christoph Böske (18frames)
